Draw an even number of shoes in the box.

Play the odd finger out game

Let's play the odd finger out game!!

Start by calling out a number. I'm going to say 5.

Count up to 5.
Start by holding up your left thumb for one.
Then your right thumb for two.

Then your left index finger for three and your right index finger for 4.
Then the next left finger for 5.

Keep the thumbs and fingers up and put your hands together.

If every finger has a partner the number is even.
If a finger does not have a partner, the number is odd. I have a finger left over so 5 is odd.
